Azalea Networks Partners with CEC CoreCast to Distribute its Advanced Wireless Routing Solutions

Milpitas, CA and Beijing, China – May 7, 2008 – Azalea Networks, a leading innovator in wireless routing equipment and technology, today announced that it has entered into a distribution agreement with CEC CoreCast Co., Ltd. to distribute its industry-leading wireless routing products in China. The partnership leverages the strength and regional influence of CEC CoreCast, providing a key distribution channel for Azalea Networks' patent-pending products and technology to satisfy increasing demand for wireless solutions in numerous industries throughout Asia.

Azalea Networks is a market leader in China, providing wireless routing solutions for wireless cities (including the build-out of Beijing's "wireless city" in preparation for the Olympic Games), oilfields, transportation, security and video surveillance, as well as port and transportation logistics. CEC CoreCast, affiliated with China Electronics Corporation (CEC), provides networks for radio, television and telecommunications, telecommunication products and services, as well as computer systems integration. "The partnership with CEC CoreCast makes Azalea's leading wireless routing solutions available through one of China's premier channels for communications products and networks, continuing to foster the growth of wireless communications throughout the country," stated John Elms, CEO of Azalea Networks.

According to the IDC, the wireless network market is continuing a rapid growth rate in China, with wireless broadband networking solutions leading the way due to the flexibility, scalability, and reliability of recent technological advances, including those patent-pending

technologies at the core of Azalea's wireless equipment and solutions. Fang Wu, founder, executive vice president, and director at Azalea Networks, commented, "With Azalea's unmatched commitment in offering robust in-country support to its partners in market strategy, system services and training, this new channel will greatly enhance the effectiveness of wireless communications throughout many industries in China." The two partners plan to collaborate on marketing and promotion of Azalea's wireless technology to better satisfy demand for wireless communications in China and boost the overall development of information-based technology.

About Azalea Networks

Azalea Networks, headquartered in Milpitas, California, (www.azaleanet.com), and Beijing, China, (www.azaleanet.com.cn), is a leading wireless routing technology provider. Delivering the highest performance and industry leading scalability and support, Azalea is the number one wireless routing technology solution provider in China and among the fastest growing wireless companies in the global market.

About CEC CoreCast

CEC CoreCast Corporation Limited (www.cecgt.com) is principally engaged in the communications and information technology (IT) industries. The company operates its businesses under three segments: radio and telecommunications networks, integration and distribution of computer systems, as well as the manufacture and encapsulation of integrated circuit (IC) cards.
