

Wireless Broadband anytime & anywhere

## **Azalea Networks Announces Agreement with OlenCom Electronics to Distribute its Wireless Mesh Network Solution**

***Company's international outreach grows as Azalea's wireless mesh network routing solution becomes available in Russia and central Asia***

Milpitas, California – December 2, 2008 – Azalea Networks, a leading innovator in wireless network equipment and technology, today announced an agreement with OlenCom Electronics Ltd. to distribute its innovative wireless routing technology throughout Russia and central Asia. OlenCom is an international distributor of data and telecommunications equipment.

As a partner in Azalea's ongoing international expansion of its channel program, OlenCom will provide Azalea's innovative wireless routing solution to municipalities, governments, and industrial enterprises throughout Russia, Belarus, Ukraine, Kazakhstan, Tajikistan, Turkmenistan, Uzbekistan, Kyrgyzstan, Georgia, Armenia, Azerbaijan, and Moldova. Vladimir Karvosenoya, Vice President, Advanced Technologies and Solutions for OlenCom said, "Azalea's wireless mesh technology will help us meet the needs of our customers who require a superior wireless mesh solution, particularly those requiring high-quality wireless video surveillance at a low cost of ownership."

Azalea's technology provides municipalities, public safety applications, oil and gas operations, shipping ports, distribution centers, and business and education campuses with the benefits of turn-key wireless solutions while offering the ability to expand, grow or modify a network as needs change. The "intelligent" characteristics of Azalea's network routing technology are inherent in its ability to deliver peer-to-peer routing across the entire network while enabling network management from the host to the client. Azalea's solution also enhances its wireless network's integration with other wireless and wired networks, including the Internet, enterprise networks, or service provider infrastructure, adding flexibility for the wireless network operator.

Rake Jiang, Azalea Vice President and General Manager, International Markets and Global Strategic Alliances, commented "Azalea is excited to tap into the rapid growth of broadband wireless applications in Russia and the regions served by OlenCom. These areas will truly

benefit from the world's only Layer-3 wireless mesh solution, whether the application be for metro and transportation applications, last mile access for service providers, security for campuses, or video surveillance. This will have a profound impact on customers' ability to quickly and cost-effectively deploy wireless voice, video, and data communications virtually anywhere."

#### **About Azalea Networks**

Azalea Networks, headquartered in Silicon Valley, California, ([www.azaleanet.com](http://www.azaleanet.com)) is the first company to provide network intelligence to its broadband wireless mesh infrastructure through an innovative wireless routing technology that sets new standards in price and performance. Azalea's solution is ideal for service providers, government agencies, and industrial enterprises that need the superior high performance, scalable capacity, quality of service, seamless mobility and other advantages made possible by true, intelligent network routing.

#### **About OlenCom Electronics Ltd.**
